

PHASE SHIFT

DEPARTMENT OF COMPUTER APPLICATIONS

14th - 15th SEPTEMBER 2019

ENERGY AND SUSTAINABILITY

ABOUT PHASE SHIFT

Phase Shift is the Annual technical symposium of BMSCE. The motive behind this symposium has primarily been developed inquisition, a better scientific temper and the desire to consume knowledge, and be able to apply both knowledge and the relevant skills to produce master pieces well beyond our time. Phase shift is a collaborative effort of different departments and student fora/clubs of the institution. It aims at enhancing the level of technical knowledge in the student community, and ultimately strive to bridge the gap between technical corporate organizations and students at the institutional level. A symposium of this scale is organized entirely by a dedicated student body under the able guidance of faculty. The sixth edition of Phase Shift will be held on 14th and 15th of September 2019. Over the span of 2 days, students will witness a competitive and collaborative atmosphere of technical competitions, hands on training, workshops based on trending technology, talks by eminent professors and seminars by industry professional and experts.
